Further to the decree seemed to the gazette on April 11th, 2010 under him(it) n°2010-365 subjecting the sportive events to an evaluation of their environmental incidences since they are situated on a site Natura on 2000 or near; what is the case for the organization of the 7th edition(publishing) of 3 days of Aveyron.

To date, we have no necessary information on behalf of the Prefecture of the Aveyron for the implementation of this new device. It is thus impossible to us at the moment to calculate the cost and the adjournment, regrettably compulsory on the amount of the commitments.

Looking forward to information on behalf of the administration, we thus are in the obligation to delay on October 1st the alignment (on-line publishing) of the commitments.

With all our regrets.
